The Secretary's services are at the disposal of any returned soldier or dependents desiring information and help on Land Settlement, Pensions, War Gratuity, etc. Returned soldiers and their dependents welcome at any time at the Armouries.

COULD ABSORB 20,000 MEN IN WESTERN CANADA

All Attempts to Secure Unskilled Workers Prove Unavailing.

"That the west alone could absorb at least 20,000 men for railway construction, farm work and mining, was the statement made by Grant Hall, vice-president of the C.P.R., in the course of an interview with a representative of the Calgary Herald, Tuesday morning. D. C. Coleman, vice-president of western lines, who was also present, confirmed this statement. They stated that there was a scarcity of unskilled labor in the east also, but not to the same extent as Western Canada. Mr. Coleman stated that it was not a question of wages at all. If pick and shovel labor could be found the C.P.R. could profitably spend five or six million dollars in extensions and betterments on its western lines, but the difficulty was to get this class of labor. Italians and others who in past years were principally engaged, were no longer available, thousands of them having left for their native land.

In reply to a question, the newspaperman was informed that although efforts had been made to secure some portion of any railway labor that all attempts had been quite unavailing. The Queen ships were inspected Tuesday morning by Mr. Grant Hall and Mr. Coleman, and they reported that they found everything there in very good condition.

Business generally at the coast, they were excellent. These officials are returning east Tuesday afternoon.

NEWS WEEKLY SERMON

By Rev. G. D. Armstrong

"I am crucified with Christ, nevertheless I live; yet not I, but Christ, liveth in me; and the life which I now live in the flesh I live by the faith of the Son of God, who loved me, and gave himself for me."—Galatians 2, 20.

"I am crucified with Christ; nevertheless I live." We live in deeds, not in words. We measure life, not by its duration, but by its intensity. Not how long, but how much, is the question that we should ask. We measure words and thoughts by the truth which they may contain. We measure the messages of men by the problems which they have uttered. We marvel as we think of the ability of the great Apostle to run up all human experience in the one glorious symbol of the cross of Jesus Christ. We have found as we have passed through life that the cross of Jesus Christ is the key which unlocks all life's mysteries. The key whereby we may solve the problem of sin, of suffering, of pain, the key to life's deepest experiences.

We live in deeds, not in words. We measure life, not by its duration, but by its intensity. Not how long, but how much, is the question that we should ask. We measure words and thoughts by the truth which they may contain. We measure the messages of men by the problems which they have uttered. SUFFERED ALL NIGHT

The Tortures of Dyspepsia Relieved by "Fruit-a-lives"

LITTLE BRAS D'ON, C. B.

"I was a terrible sufferer from Dyspepsia for years. I had pain after eating, belching gas, constant headaches and did not sleep well at night. Finally, a friend told me to try 'Fruit-a-lives'. In a week the constipation was corrected and soon I was free of pain, headaches and that miserable feeling that accompanies Dyspepsia. I continued to take this splendid fruit medicine and soon I am well, strong and vigorous." ROBERT NEWTON.

seeing the truth clearly, he absolutely surrendered himself to the same principles of justice and love. During the years that followed, with all the sorrow, with all the care, with all the burdens, with all the insight that comes to him in that life so full of effort, St. Paul was living ground with effort. I repeat, his experience is not that of a moment. It is the history of a life.

We have thought of the divinity of Jesus Christ. We have thought of the humanity of Jesus Christ. We have thought of the divinity of Jesus Christ. We have thought of the humanity of Jesus Christ. We have thought of the divinity of Jesus Christ. We have thought of the humanity of Jesus Christ.

A LITTLE LIGHT ON A DARK SUBJECT

Every day we are receiving letters from the mines insisting on us urging our customers to place their orders as early as possible for their winter's supply of coal. It is imperative that you stock your winter's coal during the summer months, as indications at the present time point to a big coal shortage next winter. Mine labor is very scarce, owing to so many miners returning to the European countries. Furthermore, an advance in freight rates is expected shortly and an increase in wages to the miners.... You can readily see these conditions are bound to increase the cost of coal.

Again we urge storing your supply as early as possible, firstly, to be certain of your needs; secondly, to save the increase in price.

We are prepared to fill your bins now, and will endeavor to save you these increases if you will kindly book your orders now so that we can protect you as well as ourselves.

We sell—
GALT—the best coal mined.
NEWCASTLE and **MIDLAND**—the best brands of Drumheller coal.
PEMBINA
BELLVUE and **GREENHILL** steam coal.

We sell Wood and Nut Coal for summer use.

NATURAL RESOURCES ARE AWAITING DEVELOPMENT

To Obtain Maximum Industrial Development Cheap Raw Materials Necessary and Government is Now Carrying on Extensive Investigations With This End in View.

Immediately after the Dominion of Canada acquired the North-West Territories from the Hudson's Bay Company, they engaged engineers to explore the newly acquired plains with a view of their economic possibilities. Several of the explorers came by way of St. Paul, across to Red River, and then went to San Francisco to Victoria, and then came across the Rocky Mountains. The combined reports were published in three volumes and is known as the C.P.R. report. This is the first work inquiring into the natural resources of the Province of Alberta.

Is this wonderful report the existence of large fertile areas from the boundary line to Peace River was shown; the suitability of the climatic condition from the wild flowers and a sample of wheat obtained and grown in Peace River was also shown, was the existence of the "Zuni" area; the possibility of oil development, while gypsum and other minerals are long to enumerate were mentioned.

A great many engineers have explored and confirmed the wonderful possibilities of the Province of Alberta, which are now but awaiting their development. The fact that the maximum industrial development it has been stated that cheap raw material, cheap power, a good market and a good supply of water, which are consolidated in one volume all the geographical and other information which was scattered in over one hundred volumes. This is still in the course of preparation, but will be published, it is said.

COAL SHORTAGE IS UNPRECEDENTED

The coal shortage in eastern Canada is becoming more and more acute, and Montreal advisers are of the effect that reserve stocks have become depleted. Manufacturers there, it is said, are facing an unprecedented situation which has no parallel in the history of Canada. A circular has been issued for the guidance of the manufacturers asking that they should store up as much coal as possible and that they should also avoid overloading transportation.

Coal operators in Alberta are keenly watching the situation, but they state that until the Railway Commission sit here to discuss a preferential summer freight rate that they are unable to move the matter. Another feature is the adjustment of the new wage schedule. This, they say, will also have to be definitely settled before the coal situation can be improved.

It is understood that the Railway Commission will be in Calgary this month to discuss the coal situation. Coal operators in Alberta are keenly watching the situation, but they state that until the Railway Commission sit here to discuss a preferential summer freight rate that they are unable to move the matter. Another feature is the adjustment of the new wage schedule. This, they say, will also have to be definitely settled before the coal situation can be improved.

Winipeg, May 31.—Worried over his earnings being garnished for debt by an impatient creditor, Slave Stevik, a Roumanian carting contractor, in fairly good condition, hanged himself in his stable this afternoon.

Four Nova Scotia towns are threatened by bush fires in Nova Scotia.

STATE AND UNIVERSITY

"Dr. Tord, president of the university, was good enough to set a room aside to start a museum of Alberta resources. We are also indebted to the members of the Council of Scientific and Industrial Research of the Alberta coal with the majority of the members in Alberta. While the president of the university was in the province, he was accompanied by several of the members of the Scientific Researches of the United States, principal whether the coal days were investigated. In every case the universities and the state enter into certain agreements, sharing the expense, and they work harmoniously to solve the difficult problems. Hence we will carry out our scientific work in some manner, that is, the work will be undertaken at the university. The government will furnish a chemical engineer and, together with the other scientific men who are already attached to the university, they will be in a position to solve all the necessary problems.

"We must prepare to be in a position to furnish the three western provinces with all their fuel, their fertilizers, their salt, and, with cheap power, many other manufactured articles."

Supplying the Demand for Royal Purple Calf Meal

This baby food for young animals is perfectly pre-digested, and can be fed to the youngest animals with perfect safety. It will not cause stomach or bowel trouble, which are serious ailments in young animals. Royal Purple is a sure preventive for scours.

Calves Gain Rapidly Without Milk

When the calves are 3 or 4 days old they can be fed Royal Purple Calf Meal and raised just as well without one drop of milk. What prominent breeders know and say.

"Gentlemen, in regard to your Calf Meal, I think you have the best on the market. I have used other calf feeds, but I have found that your Calf Meal is the best. I never saw a calf gain more rapidly and more healthily than one fed with your Calf Meal. I can cheerfully recommend it to all our stockmen, who wish to raise healthy calves."

Dr. J. H. Croft, a large breeder of pure-bred Holstein cattle, and an excellent authority on calf feeding, writes: "Royal Purple Calf Meal is equally good for young calves, and young cattle, put up in 25-lb. tins, 100-lb. bags. Secure it from our dealer in your town."

MEDICAL MEN FOR THE RURAL DISTRICTS

The U.F.A. is co-operating with the Alberta Medical Association in placing eastern medical men in touch with districts where no doctor is available. The subject of medical

for outlying districts was one that was much discussed at the last annual convention of the U.F.A. A very hearty effort is to be made by the farmers' organization to act in conjunction with the Alberta Medical Association in seeing that no district is overlooked. Locals in districts where medical aid is lacking are requested to inform head office, giving an idea of the population which could be served by a medical man located at some central point.

FARMERS' BUSINESS

For the past 54 years, this Bank has given particular attention to the business of Farmers.

We have helped many over the rough places, and have aided many more to the highest plane of success.

We are prepared to extend you every aid within legitimate banking practice. Come in at any time and talk over your affairs with us. You are always welcome.

The Aftermath of Action

(By Henry Chas. Suter)

THE TRUCE

It was the Christmas of 1914, and the fighting had been fairly severe when this incident happened. It has of course been the theme of much comment during the war, and not a little rumor accompanied the account of it, yet we have only recently received the exact account of what really happened, long after the struggle is over. On this Christmas Eve of 1914 it is stated that the Germans lit up their front line with Chinese lanterns. Think of it, in spite of the tremendous import of the struggle, in this transaction, these lanterns for once paled the deathless lanterns of the stars. At this point two British officers walked some way across No Man's Land; hailed the enemy and demanded audience of an officer. The German sentries at first refused, ordering the officers to return or duty bound they would be compelled to shoot. The English officers parleyed with the German sentries and even persisted in pursuing the journey across No Man's Land right up to the barbed wire entanglements of the German trenches. Such is the persistency of the British bulldog and here they again demanded an officer. This persistence won, and the sentries held fire while an officer was sent for. At length the officer arrived and the Englishmen made one-day truce with them. So it came about that the next day (Christmas Day) was spent by the enemies in fraternizing with each other. The two sides exchanged cigarettes and even played football together. Such is the love of life even when in the midst of death. After all it is still true, there comes no peace until there is reconciliation. So they found Christmas peace at least, even in time of war, with the truce of reconciliation.

Of course this has happened before with enemies. It happened in South Africa between the Boers and the British. But in Flanders the British

intended to end with the day as agreed, but decided not to shoot again until the enemy did. What a concession, and it almost makes an other story, for in the morning the Germans were to be seen in the open, washing and breakfasting outside their entrenchments. So our men did likewise out in the open. Also one of them while cleaning his rifle lost a shot by accident, and lest the truce cease an English saboteur went across No Man's Land and explained the accident and stated the shot was not fired to kill. The ones he spoke to understood, but as he was returning a German wide on the flank fired and hit him in the knee and he had walked lame ever since. The tragedies of mistakes again and again took their toll like this. Of course our men took it that some German sentry had misunderstood our fluke shot. But it ended the truce in a hurry and like most mistakes, started, continued and ended in tragedy. Everybody got into their trench, and the word was eventually passed that to no more fraternizing must take place and all such local truces were henceforth ended. But this truce was too good a thing to let go like that, and again and again, on a small scale, of course, truces were made. But nothing was heard of them out in the wide, wide world. Such is the love of life that such truces are made, and when made how they are held as long as possible.

But for that strange stray shot the whole tragedy of Flanders might have ended sooner than it did. For who will dare to question whether that truce was not making friends of enemies; but then it seems that these were the fellows who understood each other most and best, while others in high places could not or would not understand each other. So others must needs suffer and die and share in the tragedy of all misunderstanding. After all who will not agree that our struggles and strivings are becoming less because we are learning to fraternise more and thus understand each other better?

EXAMINER'S REVIEW OF PROVINCIAL MARKETS

Calgary, Friday, June 4.

Cattle

Calgary market is looking a little uncertain towards the latter part of the week, but it has been very strong since last issue of "The Examiner" and straight loads have been bringing \$15.75 and individuals of outstanding quality \$17. Cows have been selling much stronger than a week ago and several of the best ones made \$16, but towards the close of the week's business the buyers are not so keen and \$13 to \$15 took most of the good cows. Feeder buyers have been more active during the week and they are getting most of the common and medium steers at prices from \$11.25 down to \$10. Bulls have been selling well and choice ones made up to \$10.75, but are now probably a quarter under that. Calves are very scarce. Shippers may look for a break in the best prices any time.

New record prices for fat steers, heifers and calves were established by the packing-house buyers during the week, and the prices towards the last of this week show choice steers from \$15 to \$16.50; choice heifers and cows have been good, and the top heifers will make up to \$15.50; the best cows are selling from \$13 to \$14. Shippers need not expect top prices on anything but the best, as buyers are getting fussy and the market may take a drop at any time. Bulls are quoted from \$8 to \$10; choice veal calves are selling from \$13 down to \$12. Edmonton yards have a plentiful supply of stocker cattle, which will no doubt be attractive to farmers, now that spring work is well over and grass good.

Wednesday there were a few hogs in the Calgary yards and the price was from \$22.50 to \$22.75. Thursday receipts went over at \$22.75 straight through. This morning there were also a few on hand and the price was \$22.50 to \$22.50. Receipts still light but larger than previously.

Prices during the week have been holding around \$22.25 at Edmonton, but on Thursday the market was a little stronger and in instances the price was sprung up a quarter to \$22.50.

Some trading in breeding stuff at the Calgary yards, but that is about all that is moving.

Horses
No inquiry for medium weight or light horses and a very limited chance to sell any of the good ones. No movement expected for a time.

Markets are continuing strong. Alberta crop prospects are good. There are heavy showers in the west where soil was drifting and re-seeding will only be necessary in few cases. Little rain in the south. Good growth, but good progress made in planted fields. Work will be completed next week. Grain prices are good. Some districts in other western provinces, but nothing serious yet.

Butterfat prices are to be reduced again next week, the decline from Calgary creameries likely to be around 4c; receipts are satisfactory. Market for creamery butter cannot take all the output. Levels will have to be arrived at in order to ship. Dairy butter a little lower and can carry less export, fancy dairy at markets from 40c down; dealers paying 35 to 36c straight receipts; graded butter from 40c down. Eggs very uncertain and quotations range from \$12.50 down to \$10.50; dealers anxious to get under on graded receipts, with arrivals of off grade eggs. No export business on eggs yet from this province at any price. Lower prices all over. Eggs are irregular and prices at country points are from \$75 up.

Market prospects on this season's clip very uncertain and dealers say they have not had big from manuretors on which to base quotations yet.

Hides

Conditions in trade very discouraging and dealers say they cannot get bids from tanners. Lower prices all around, grain salted butcher hides,

FEAR

(By Dr. Frank Crane)

To the Seven Deadly Sins listed by the Church there should be added an Eighth, the deadliest of all.

It is the Sin of Sin. It enters as chief septic ingredient into every sin.

God is Love. In Love there is no Fear. God is the only one in His universe who is utterly Unafraid. To Him only, of all beings, the Frightful have no meaning—Pain, Death, Loss and the End of the World.

The Devil is pure Fear. His is the greatest Fear of all, for he is afraid to be Good.

Our worst fear is the fear to be happy.

We crucify ourselves upon the false cross of ignorance, and thrust into our own side the lance of superstition, to save ourselves from being happy.

Happiness is your rightful inheritance. Take it. As the Lily takes it, asking no question. As the bird takes it, leaning its wing upon the air, drinking with undimmed eye the sunlight.

Happiness makes health. There are a dozen fatal diseases that medical men now agree are caused mostly by a daily dose of fear.

It has a toxic effect. It habit forms, we get so we crave it, as if our regular hypodermic of morphia.

Fear destroys skill, prevents craftsmanship. No surgeon who is afraid can produce a masterpiece.

No merchant who is afraid can be a success in his business. No soul who is afraid can be good or great.

Before every youth lies the Promised Land. Of his dreams, of triumph, of love, of high promise. And to him, as to ancient Joshua, comes the command from the sky.

"Only be thou strong, and of a good courage, and the land shall be thine, whosoever thou settest thy foot."

Fear is the enemy of Love.

To love victoriously, to make love a crown and triumph, calls for much bravery.

Jealousy is love robbed by fear. With fear come unfath, suspicion, sorrow of betrayal, and the soul stings itself to death as a scorpion.

He that believeth not shall be damned. The world is full of the damned, afraid to believe.

Afraid of faith! Afraid of trust! Afraid of love! Afraid to help! Afraid to be happy! Afraid of God!

Like a poison stink from the open mouth of hell, Fear creeps over the earth, and winds its malignant wings about stifling souls.

Be brave! Only so can you be great.

POLISH-AMERICAN RELIEF TRAIN IS SHELLED BY REDS

Warsaw, June 6.—Re-inforcements have been thrown in all along the line of the northern front, and the Poles are daily repulsing the attacks of the Bolsheviks, says a supplementary communication issued last night by the Polish government. The Bolsheviks are reported to be withdrawing across the upper Berezina river.

Coal! Coal!

And More Coal

JUST ARRIVED THREE CARLOADS A-1

Saunders Creek Lump Coal

The wise man knows this is the proper time to lay in his winter supply of coal. He also knows SAUNDERS CREEK LUMP, according to analysis, is the best storage coal in Western Canada. FARMERS WANT CONTINUATION OF WHEAT BOARD

Executive of Canadian Council of Agriculture Makes Request.

Winnipeg, June 3.—Asserting that the Canadian wheat board cannot exercise control over the 1920 crop unless its authority is renewed at the present session of parliament, the executive committee of the Canadian council of agriculture last night telegraphed the Dominion government urging that the necessary steps be taken to have government control of the wheat crop continued for at least another year.

The resolution of the executive committee, as forwarded to Ottawa, read: "Resolved, that the Canadian council of agriculture last January favored government control of the wheat crop of 1920-21 provided that 'controlled buying should be continued on the part of overseas importers of Canadian wheat'."

The resolution also pointed out that the conventions of Alberta, Saskatchewan and Manitoba organized farmers subsequently approved of this resolution, and asserts that "there is no indication of the lifting of government control of buying on the part of the countries importing Canadian wheat so as to affect the marketing of the next crop."

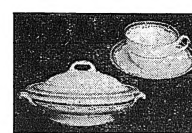

The resolution then continues: "Whereas, the present Canadian Wheat Board is under and in virtue of the provisions of the war measures act, fortified by a special act of parliament and provided with powers over wheat grown in Canada in 1920 unless its existence is continued for another year by an act of parliament at the present session:

"Therefore the executive committee of the Canadian council of agriculture, before the prorogation of the present session of parliament, to take the necessary steps to have the powers of the Canadian wheat board continued at least for another year."

Winnipeg, June 3.—Many rumors were heard around the grain exchange Wednesday in regard to the control of coarse grains by the government as well as wheat.

The Winnipeg Free Press says: "President J. E. Bottrell, when asked concerning the control of coarse grains, said:

"We have had many communications from our secretary, Dr. Magill, in regard to certain amendments to the grain act. The last wire received from Dr. Magill indicates a great deal of agitation on the part of certain members of parliament for continued control, and Dr. Magill states that, in his opinion, if control is confirmed it will be made to include foreign grains as well as wheat; in short it means nationalization of trade in all cereals."

PAYING EN ROUTE

The question of deferred payments in the purchase of motor vehicles is discussed at length by John Chapman Hilder in the May issue of Motor. One of us remembers when this practice was frowned upon by the solid financial interests. "If any proof were needed today that the automobile has passed out of the luxury class into the necessity class," says Mr. Hilder, "it can be deduced from the definitely changed attitude of bankers throughout the country, who now not only approve of a man's owning a car, but actually help him to buy it."

Seeding is just about completed in this district. Quite a number from here took in the dance at Sandy Cove hotel on the 24th, and report a good time.

Mrs. Dr. Warke is home again, and is greatly benefited by her trip.

F. T. Edwards and G. Cuddy were visitors in Red Deer this week.

A. Orr has gone to work for A. S. Cuddy, Edwell, for a summer.

Sir Orr went to Innisfail on Wednesday for his wife and family, who arrived on Thursday.

C. V. Warke has added another quarter to his holdings.

Edwards and G. Cuddy also have each purchased another quarter.

Real estate men were through here on Thursday looking over the vacant lands.

WEDNESDAY, JUNE 9th, 1920

RED DEER IGNORED

The road running west to Sylvan Lake is in a deplorable condition. Culverts are washed out, mudholes are numerous, and some parts are in the roughest kind of state. This is an "A" government road, and as such is entitled to the best kind of treatment by the government, who guarantee to keep it in repair and pay three-fourths of the cost of doing so. This constituency, when represented by Mr. Michener, received some pretty good treatment from the government, and when a Liberal was elected we were promised all sorts of things. But, as a matter of fact, we believe we are getting more scurvy treatment with a government member than when we returned a member to the opposition benches. The overseers, who are paid to attend to our roads, cannot apparently get over the idea to ignore Red Deer. The road running east was marked an "A" road on the government maps, and then was only allowed to be in class "B." The government pay three-fourths of cost of repairing class "A" roads, and only one-fourth of cost of repairing class "B" roads, so

there is a difference—and they have to keep the former in repair. Then we were promised a bridge, but that, like other promises, seem to end in promises, while citizens of this district are suffering from the worst kind of inconvenience. It is high time something was done or the citizens of the city should know the reason why.

DANGERS OF PROFITEERING

Profiteering as it has been experienced throughout the world for the last few years cannot always be suffered. There must be an end to it. The extraordinary markets and the large issues of credit that have been exploited by the grasping will not always be at their service. Profiteering is a present hardship to the mass of the people, and it is a grave danger to a community. After a people has gone through the war and has borne the hard trial of this long profiteering campaign, it ought not to be exposed to the danger of a breakdown in business. Action and reaction are equal and opposite. An abnormally high and exceptionally profitable level of prices sustained for a time tends to be succeeded by a period of depressed prices, reduced production, lowered wages and increased unemployment. Unfortunately it seems easier to maintain exorbitant prices than it is to lift trade out of the depths of depression once it has fallen thereto. Whether prices are greatly bought up or sunk low the mass of the people get the worst of it. They get it both going and coming. The people never fare so well as when prices and profits are moderate. Profiteering is dangerous, says the Toronto Mail and Empire, for the community in another way. It fosters the spirit of speculation. People are lured on by the great earnings of industrial enterprise to invest their money in the securities of companies carrying on these enterprises. They consider the stocks of such companies certain to advance to still higher points, than those already reached, and by their free buying of these stocks they bid them up and thus their devotees themselves with the prospects of gain. When the orgy of profiteering comes to an end the stocks collapse, and the result is not only ruinous for speculators, but it would be hurtful to the country as a whole, inasmuch as it would hurt

17 downward and tend to make more painful the movement from prosperity to depression. The influence of Parliament and the powers of Parliament should be exercised to prevent calamity coming on the country as a result of the profiteering campaign. The world shortage will have its day and the opportunity to make excessive profits will come to an end. Already there are shrewd men in various lines of business who are willing to retire and turn their holdings over to some new owner of fortune. Now is the time for the Government to take the time for Governments to apply themselves to the easing of the transition from the days of abounding demand to those when shrunken demand will start the forces of competition working again. There may be a smash, but if there is not, it will be because timely measures have been taken for the gradual settling down to the new conditions that will govern business when production has become normal throughout the world, as it must within two or three years.

CO-OPERATION URGED IN COMMUNITY SERVICE

Edmonton, June 4.—In view of the fact that co-operation between the Presbyterians and Methodists on mission fields has saved men and money for the work, and this made for increased efficiency, the Alberta Methodist Conference on Thursday evening passed a resolution that immediate steps be taken to appoint committees from the different evangelical churches and western councils of the Young Men's Christian Association with a view to co-operation in community service. That the churches be asked to select from among the ministers men especially suitable for the work who shall at the expense of the church, be given special training. That certain towns and villages, where two evangelical ministers are now stationed, be selected to unite their forces and accept one minister to do the preaching and pastoral visiting and another one, trained for the purpose, to take charge of the church community activities during the week.

SESSION SHOULD END THIS MONTH

Ottawa, June 4.—Now that the budget debate is ended, members are talking of getting home by July 1. The taxation schedule is expected to come up today, after which there is little beyond the franchise act of a controversial nature to be disposed of. Government members say a week of sitting through a vote Wednesday morning. Had the vote not been reached then, they would have had to demand one either on Wednesday, Friday, or Monday. So the debate would have gone until Thursday next week. Whips state now that three weeks should finish the session.

TWO GOOD REASONS.

Two good economical reasons why you should eat more fish: It is cheap and nutritious, and provides a third meal. One of Canada's greatest sources of wealth is her fisheries, and you help develop the industry by eating fish, and also help to put Canada in a better financial position. Probably you are not aware how little fish Canadian people use. Great Britain is one of the greatest fish consuming countries in the world. During 1918 she had a per capita consumption of 58 pounds, and in 1919 it is believed this was increased to 60 pounds. This means that each individual consumed at the rate of more than one pound per week. In the United States last year it is estimated by officials at Washington the per capita consumption was 19 pounds. Although little reliance can be placed on these figures, there is no doubt but that the total consumption in the United States has increased greatly in recent years. A few years ago the per capita consumption in Canada per annum was a matter of ounces. Through the combined efforts of the Canada Food Board and the Fisheries Branch, it is estimated that the local consumption at one time reached a point equal to 45 pounds per capita. During 1919 it is estimated the per capita consumption was somewhere between 25 and 25 pounds per annum. Canada is one of the greatest, if not the greatest, fish producing countries of the world. Why have our people so little faith in fish?

CADET INSPECTION

Major Miller, Calgary, Inspector for Military District No. 12 of Cadet Corps, visited the Red Deer Public and High School Corps on Wednesday afternoon and for an hour and a half put the boys through their paces, expressing himself very pleased with their physical drill and discipline. A roll of 81, there were 76 on parade under Company Commander Ronald Guetz and Platoon Commanders Ewen Galbraith, Robt. Archer, Bruce Springbett, Chas. Michener, and McGregor. The inspection reflected great credit on the boys and on Mr. Fowler, the instructor.

A WARNING

A warning is being sent out from the Reclamation Service of the Department of the Interior at Calgary to persons who are operating on, or have property along the large rivers in Alberta. Investigations show that there is more snow in the mountains this year than under ordinary conditions, and this fact combined with the very late spring, creates a condition favorable for very high water or floods. This is not a prediction that there will surely be a flood, but rather an early warning that there may be one. Persons carrying on any construction work, operating ferries, driving logs, etc., will be well advised to make every provision possible against the eventuality of a flood.

GIBSON-McMILLAN
A quiet wedding took place at the residence of Mr. and Mrs. John McMillan, First St. South, on Thursday afternoon when Miss Isabel, the youngest daughter of the house, was united in marriage to Mr. Hugh S. Gibson, of the Bank of Commerce staff, Calgary. Rev. G. D. Armstrong performed the ceremony. The bride was beautifully dressed in white Georgette over white silk with veil and orange blossoms carrying roses, and was supported by Miss Fraser, who was her comrade in her nursing course at Calgary hospital. Miss Fraser was dressed in blue satin and Georgette crepe. The groomsmen were Mr. P. S. Crabb, of the Bank of Commerce staff, Calgary. A merry party sat down to a nicely appointed luncheon, after which Mr. and Mrs. Gibson left for a short wedding trip prior to taking up their home in Calgary. The bride is well and favorably known to most of the Red Deer people, who will wish her and her husband all good fortune in their married life.

NEWSPAPERS THREATENED WITH EXTINCTION

Ottawa, June 1.—Twenty-six daily newspapers, being twenty-five per cent of the total in Canada, are facing suspension owing to inability to get assurance of newspaper supply at current contract export price. They have appealed to the government, and the government has asked the Canadian Daily Newspaper Association for a definite statement of its position regarding their request. Montreal, June 1.—The Canadian Export Paper Co. Ltd., today announced its prices of export newspaper paper for the third and fourth quarters of the current year, the new prices showing very large advance over the prices previously prevailing on their export paper prices. For the third quarter of 1920, which commences July 1 next, the new prices will be 5 1/2 cents a pound, mill, which is equivalent to \$10 per ton. For the fourth quarter of 1920 which commences October 1 next, the new price will be 5 1/2 cents a pound, mill, which is equivalent to \$10 a ton.

MONEY

Every honest man must make a certain amount of money in order to pay his bills, he squares with the world, save his self respect and play his part in the life of his day. When money is thought of as the tool of life, the means of doing things worth while and buying the things which are good and beautiful, then money becomes a joy and a power for good. When a man simply makes a lot of money just to have the power it represents without due thought of its responsibilities—then money may be a curse to life. When money makes a snob, a fool, or a libertine, money has gone wide of its true aim. Many men get flabby in the luxury money provides—many men get lazy in the freedom money buys, many men become cruel in spirit and unreasonable in mind, in the power money represents. Money buys books, but it takes brains to appreciate them. Money buys pictures, but it takes the eyes of a real artist to see their beauty. Money can build a large house and fill it full of furniture, but only love and

true character can make a home. Money can provide the make-up to fool men on earth, but money cannot change the looks of a soul as the clear eye of God sees it. The main point with a true Rotar-

ian is not how much money does he make, but what does he do with it in the world. If you have genius to make money then the world asks you to use the same genius in its use. A rich, is-

norant, selfish, idle fool is a pathetic sight to God and man. Rusty dollars are always witnesses against the men who owned them. Hoarded dollars are in prison serving life sentences.

SIXTY THOUSAND TROOPS ON DUTY IN IRELAND

Dublin, June 6.—A few more vacant police barracks were burned over the week end. John Blake, a land owner, was shot from behind a hedge and seriously wounded at Thom, 19 miles northeast of Galway, while on his way to church. A military police patrol on bicycles was ambushed and surrounded near the village of Carrigtohill, County Cork, this morning. The policemen were compelled to surrender their arms.

Oakburn House, at Macroom, County Cork, the property and former home of the Bowen-Colthurst family, was burned Saturday.

The court house at Fermont, County Cork, was wrecked Friday night. The police barracks at Kilmurray, County Clare, was burned.

Dublin, June 6.—Although information regarding the number of troops in Ireland is refused by the authorities, careful estimates placed the present number at more than sixty thousand, which is being increased daily. The troops come from all parts of England and latterly the government has evinced a desire to send seasoned men instead of raw recruits.

The declared purpose of the military precautions is to preserve order and protect the police, and the chief quality cultivated is mobility. The idea is that police barracks should be kept in immediate touch with military support.

Some of the barracks now have wireless installations and a new form of rocket recently has been supplied. The rocket attracts the attention for miles. The new plan has in some cases secured the prompt arrival of soldiers and relief for threatened police.

PATROLLING BY MILITARY
Patrolling at night is mainly done at present by the military, who hold up people and cross-examine them regarding their business. The most remote Irish roads are now familiar with military lorries, and armored cars and tanks, though never yet in active action, are often sent through town streets as a demonstration of power. Cavalry frequently is seen on map drill, studying the topography of certain districts. The importation of sixty pounders and garrison artillery, previously hardly known in Ireland, is taken here to point to more than police work. A leading officer at general headquarters, in conversation Saturday, said the situation was more serious than generally supposed. There is constant apprehension of the landing of arms for the republican elements from abroad, and it is considered significant that troops have been stationed at places near the coast.

MARTIAL LAW CONTEMPLATED
Application of martial law is said to be in contemplation but mainly as a demonstration of the government's determination since its efforts to restore order already are available. Extension of the "curfew" order throughout the country is considered probable. Most of the attacks by raiders are carried out at night, and it is believed that assemblies of raiders might be prevented or followed up more easily, if, as in Dublin, every person out at night were liable to arrest.

ALBERTA HIGHWAYS TO BE IMPROVED DURING SUMMER

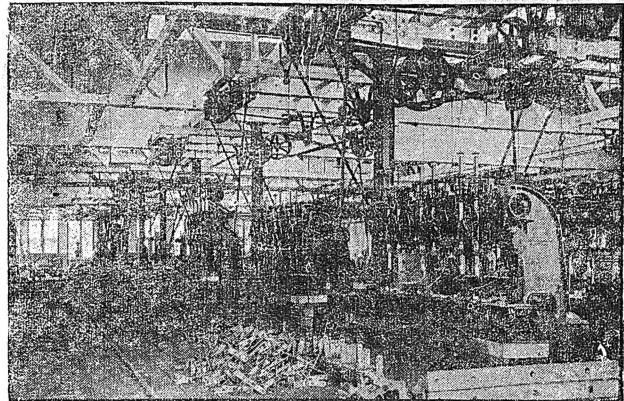

Work is about to begin on the main highways improvement programme of the department of public works. The intention is to put considerable mileage of main roads throughout the province in shape to qualify for the federal highways grant, which means that the roads will be built up to a specified standard and as nearly permanent as the character of Alberta soils and road-building material will permit.

Edmonton to the international boundary at Coutts will be one of the pieces of road thus to be improved. Other roads east and west of both Edmonton and Calgary will also be taken up during the season, the programme being limited chiefly by the labor situation.

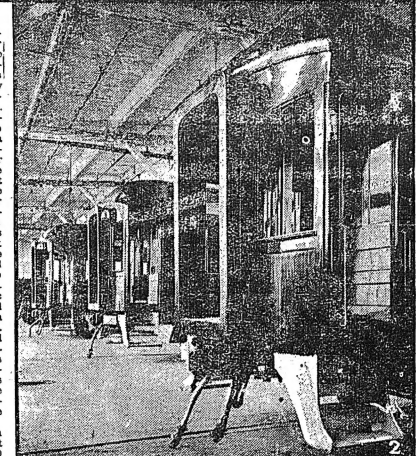

Some of the road crews have already made a start in the south, but it is not expected, according to Hon. A. J. McLean, that a full force will be available until the farmers are done with their seeding. Employment will be given during the summer to 300 men or more, if that number can be secured, and the purpose is to give the work to local farmers so far as possible.

A considerable part of the work, as the minister outlines it, will consist of grading and draining. The roads in many places are greatly in need of better drainage, and this will be one of the points emphasized in the highways improvement programme agreed upon between the province and the federal authorities.

EXTENDING C.P.R. WORKS

In order to speed up on the construction of equipment required for the rapidly expanding traffic on the Canadian Pacific Railway, large extensions are being made at the Angus Shops in Montreal, which are already the most elaborate and comprehensive of their kind on this continent. These extensions will cover a quarter of a million square feet and are expected to cost approximately a million dollars. The largest addition will be made to the passenger car shops, amounting to 71,000 square feet, while over 55,000 square feet will be added to the locomotive shops, and 42,400 to the freight car shops. The following are the detailed particulars of the extensions:

Locomotive Shop—The extensions to the Locomotive Shop will consist of an addition at each end of the present shop to give an additional floor area of 55,000 square feet. The construction will be steel frame, concrete foundation, brick walls. Mastic floor will be placed on the west end extension and wood block floor on concrete in the east end extension. The east shop extension is to be used as a running shed, and for this reason pits with mill type smoke jacks will be installed. All of the skylights will be constructed in wood as metal has been found to deteriorate very rapidly, and for the same reason mill type ventilators will be used throughout this shop.

Freight Car Shop—Consists of an extension to the present building at the west end, 106 feet wide by 400 feet long, giving an additional floor area of 42,400 square feet. The construction will be steel frame, concrete foundation, brick wall, wood floor and roof similar to present building.

Passenger Car Shop—This shop will be extended at the west end 75 feet, and will be 50 feet in width, and is a three-story fireproof building. The construction will be steel frame, concrete foundation, brick walls, steel sash, concrete roof and floors.

Painting Shop—Consists of an extension of 102 feet by 161 feet between Shops 2 and 4, and 137 feet by 161 feet between Shops 1 and 3; and 137 by 213 feet east end extension of shop three, giving a total increased area of 71,000 square feet. The construction will be concrete foundation, brick walls, mill type roof, concrete and mastic floors. These shops will be all served

(1) Some of the machinery in the Angus Shops.
(2) Cars for passenger service turned out at Angus Shops.

from the present transfer table, the pit of which is being extended.

Car Electrical Shop—This is a new building 62 feet wide by 362 feet long, giving a floor area of 22,600 square feet. The construction will be steel frame, concrete foundations, with brick walls and acid proof mastic floor.

Planing Mill Shelter—A shelter 126 feet by 144 feet long will be built on the west end of the present planing mill for the purpose of keeping material under cover as a weather protection and will give an area of 18,000 square feet for this purpose.

Dry Kiln—Four new stalls will be added to the present west dry kiln, increasing the area by 7,500 square feet. The construction will be spe-

THIRD SEMI-MONTHLY CROP AND LIVE STOCK REPORT

Edmonton, June 1st, 1920.
The crop situation over the past fortnightly period is marked by two outstanding features—favorable moisture conditions throughout the province and rapid progress towards the completion of seeding. Livestock have kept the under supply of moisture moving up to the roots of the crop but not heavy enough to check seeding. Horses and machine power are proving adequate to needs. Good labor is rather scarce. The reduction in total crop area is almost negligible, subject to possible reduction in rice grain and larger supply of green feed on account of lateness of season. Wheat acreage is reduced ten per cent. for the province, and oat and barley acreage increased in Southern Alberta but not much in, increase in central and north.

Regular wheat seeding completed a week ago, except for small belated areas. Only one barley field has yet rapid on account of cool weather but wheat is nearly all through, and well rooted and green. The general lateness of the season and high winds over a small area are the only limiting conditions to good results. Some soil blowing has occurred at certain points in the south, but prospects have improved since last report and on the whole excellent. Grass on the prairie is the best in years. Stock losses are over. Loose horse stock already considerably improved and cattle stock beginning to fill. Sheep are doing well, but the lamb crop is not so good. The stock in the worst situation of any. Over sixty per cent. of sows that should litter this spring were sold for packing plants last fall. The pork output this year promises to be light.

CALGARY EXHIBITION

The prize list for the Calgary Exhibition may be obtained by writing to E. L. Richardson, Manager, Calgary. The Fair dates this year are June 26th to July 2nd, and entered close on June 14th. Over \$7,000 has been added to the prize list for the live stock department for this year, making the total amount offered in all departments now \$34,500.

The new building, a thousand dollar cattle stand and judging pavilion will be used for the first time. This will add greatly to the comfort and convenience of the exhibitors. Calgary is fortunate this year in being able to secure Lockier, possibly the most daring acrobatic performer in the world. He does acrobatic stunts all over an aeroplane, and finishes his act by changing from one machine to another in full flight in mid-air. This is positively the greatest attraction that can be obtained for any exhibition.

Two polo will also provide many thrills for Fair visitors, while the musical programme will be supplied by Canada's crack military band, the 48th Highlanders, of Toronto.

Special passenger rates will be in force for the Calgary Exhibition from all points in Alberta, Saskatchewan and British Columbia east of Golden on the main line and Nelson on the Crow's Nest.

"IT SAVED MY LIFE," DECLARES STEPHEN

Was Flat on His Back With Stomach Trouble When He Began Taking Tanlac.

"Honestly, I don't believe I would be alive today if it hadn't been for Tanlac. I don't know how to describe it, but I can never say enough for it," said A. M. Stephen, of Redvers, Sask., who is in the butcher business in that city, but now spending a few months in Vancouver. Mr. Stephen has lived in that part of Saskatchewan for the past thirty years and is well known, having been one of the first settlers in that section of the province.

"For twenty-five years I had suffered from stomach trouble more than I will ever be able to tell. My appetite was very poor all the time, and at times even the smell of food would nauseate me. Everything I ate lay heavy on my stomach and fermented, gas would form and sometimes there would be some intense pain in the pit of my stomach. I could hardly stand it. I suffered with severe pains in the region of my heart, which were pitifully distressful, and at times I became frightened, for I felt as though I was going to faint. I had just about all the time, and I often became so dizzy I had to catch hold of something to keep from falling. Then, too, there was always such awful pains across the small of my back, I could hardly get up or lie down. I kept getting worse, until finally last winter I got so bad off I was not able to get to bed. I was taken down suddenly, my stomach would not digest a single thing, and I was so weak I could hardly get up."

"Along about this time Tanlac was put on sale where I live, and I decided to give it a trial. Well, sir, I firmly believe it saved my life. I had not taken all of the first bottle when I commenced to digest what I ate, and when I had two bottles I had a splendid appetite. I was again able to get to bed, and I was so improved that I was steady, until now I am never troubled with gas, pains in my stomach, back or around my heart, and am not bothered with palpitations. In fact, I am in better health in every way than I have been for years. I never expect to be without Tanlac again, and never intend to miss an opportunity to praise it."

Tanlac is sold in Red Deer by Gates-Cornett Drug & Book Co., and by the leading druggist in every town.

THE CEDARS OF LEBANON.

There are only about four hundred of the cedars of Lebanon left. The Maronite priests almost worship them and call them "The Cedars of the Lord," and a recent governor of the Lebanon surrounded them by a great wall, so that the young shoots might not be injured by roving animals. Yet, century by century, their number grows less.

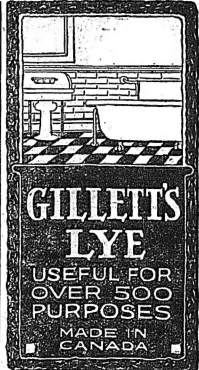

But the few remaining are of royal blood. They are not the largest of trees, though some of the trunks measure over forty feet around. Their heavy, lies in the wide-spreading limbs, which often covers a circle two or three hundred feet in circumference. Some are tall and symmetrical with beautiful horizontal branches. Others are gnarled and knotted with twisting scars in the gnarled bark and charming beds on the thick foliage of the swinging boughs. The wood has a sweet odor, is very hard, and seldom decays.

The vitality of the cedar is remarkable. A dead tree may stand for years except when lightning or the axe has been at work.

Often a great bough of one tree has grown into a neighbor, and the two are so bound in together that it is impossible to say which is the parent and which is the offspring.

ROD AND GUN FOR JUNE

Bonnycastle Dale, the well known naturalist, has written and illustrated a splendid article descriptive of trapping conditions in Rice Lake, Ontario, during the 1919 season. This appears in the June issue of Rod and Gun in Canada along with nine other stories and articles dealing with the wild life in the great outdoors of Dominion. "The Red Gods" are calling instantly now that grim winter snows have gone, and even if you are not in a position to enjoy the real outing that you like, you can live again the happy days of former outings by reading the pleasurable narratives set down by fellow lovers of the wilds. The June issue of Canada's national sportsman's monthly contains the usual high class Gun and Ammunition, Fishing, Notes, Conservation, Kennel and Trap Departments. Rod and Gun in Canada is published monthly by W. J. Taylor, Limited, Woodstock, Ont.

MAJORITY OF 26 FOR GOVERNMENT

H. O. Wright, Battleford, and J. A. Campbell, Nelson, Vote Against the Government.

Ottawa, June 2.—By 120 votes to 94 the Fielding amendment to the budget speech was defeated in the commons at 6.30 this morning. The house had waited throughout the night and the early morning hours for the result of the vote, and when the division bells rang, there was a general flogging of members to the chamber. When the vote was announced cheers arose from the government benches. The government majority on the motion was 26. H. O. Wright, Battleford, and J. A. Campbell, Nelson, Man. former government supporters, voted for the Fielding amendment, while W. A. Buchanan, Lebridge, who had announced his intention of opposing the government tariff proposals, was not in the chamber when the vote was taken, but was paired with Dr. W. J. Edwards, Frontenac.

GREAT INTEREST SHOWN

Not only the members of the house, but many visitors, who came to the galleries early Tuesday evening to hear the debate, remained to get the latest information on the result of the division. Nearly a score of ladies who had occupied seats in the members' gallery during the whole evening session, remained for the taking of the vote.

During the long hours of the night and morning session, while speaker after speaker added his weight to the argument on one side or the other, a lonely and hushed stream of which somehow had gained entrance to the chamber, flew over the heads of the members, and at times rose so low over the heads of the ladies in the galleries that papers and fans were waved to repel the unwelcome visitor.

While the division bells were ringing, and the members waited for the taking of the vote, songs arose from the benches on either side of the chamber. The French members were to the fore with their folk songs, in which a number of fervent supporters joined at times, and good natured chaff prevailed between members of either side as to the money and how they were so low over the heads of the ladies in the galleries that papers and fans were waved to repel the unwelcome visitor.

DEBATE SHUT OFF

At 5.40 this morning, as A. L. Desautels arose to address the house in French, the lights in the chamber were extinguished for a few seconds. There was sufficient daylight to continue the debate, and Mr. Desautels attempted to proceed amid cries of "question."

The lighting was soon flashed on again, and the cries dying down, Mr. Desautels proceeded with his speech.

The house adjourned at 6.35, the original motion to go into committee was carried by a majority of 26.

Sir Robert Borden announced that later in the day the house would take up the Opium and Narcotic Drug Act, Admiralty Act, Employment Offices Consolidation in the House, Shipping Act, Placer Mining Act and the Northwest Game Act. The house adjourned until 3 o'clock this afternoon.

H. A. Mackie, Edmonton, who had waited for the Fielding amendment, rose again when the "muzz" were called, and stated that he had previously voted in error.

SIR THOMAS LIPTON SAILS FOR AMERICA

London, June 2.—Crowds of well wishers saw "For He's a Jolly Good Fellow" as Sir Thomas Lipton departed by train for Liverpool this morning on his way to the Olympic Games in New York to attend the international yacht races in which his Shamrock IV will enter the championship. The cup from the American Defender Resolute or Vanitie.

After the last few days Sir Thomas has received innumerable messages from all parts of the world wishing him good luck in his efforts to "lift" the historic cup. Dowager Queen Alexandra, in expressing her hopes that Sir Thomas would win with the Shamrock IV, said: "Certainly I am confident. But I am glad I am not too sure, for then there would be no sport for anyone."

UNIONIST CAUCUS TO DECIDE FUTURE

An Issue Between Tariff and Free Trade Election Can Be Carried.

Ottawa, June 2.—The government lines stood firm on the budget vote. There were three hotlers, but the government pulled as many votes on this division as it did on the budget a year ago. Apparently a good many Liberals who absented themselves a year ago turned up for the budget vote this year, and the government majority was therefore reduced to twenty-six. It is not a large majority, but it answers the purpose. The government will get through the session, but before their supporters are some there will be a big Unionist caucus to decide the future. The Conservative Unionists are strong in believing that the platform of the new party must boldly champion the principle of protection. They also believe that the name "Conservative" must figure somewhere in the name of the new party.

UNABLE TO CANVASS

The western farmers who stood by the government on the budget are not likely to break away at a future session, while the Liberals are threatened with a defection of some of their members, who are talking of joining the Farmers' group. The Liberals are also embarrassed by the dissatisfaction in Quebec of the leadership of Hon. McKenzie King. Quebec really brought about Mr. King's election as leader, but he has been more or less grousing ever since. One reason is his inability to speak French, which makes it impossible for him to meet and canvass the people of Quebec.

It was observed that neither Ernest Lapointe nor Hon. Jacques Bureau took any part in the budget debate, it is said on what seems to be good authority that they were requested not to do so by Sir Lomer Gouin, Sir Lomer looking for a big inflow of capital into Quebec for industrial development, and views with a distrustful eye any movement toward free trade.

ALL POUND THEIR FEET

The three parties in the house all found their feet more or less in the debate. Government supporters a rule came out for protection. Hon. T. A. Cramer, the leader of the Farmers' party, boldly stated that he wanted the protective principle eliminated from the tariff. The Liberals were somewhat divided among themselves showed a tendency to get in the middle of the road and accuse the Conservatives of being too extreme.

On an issue between protection and free trade the government may carry the next election bill. It is the people who make the issue and not the politicians. The luxury tax is proving unpopular, and the government may be opposed on other grounds by people who ordinarily would support it on the tariff question.

WANT THE NAME KEPT

A prominent Conservative Unionist stated tonight that unless the Unionist government were to address by Sir Robert Borden, kept the Conservative name, the Conservative organization and the Conservative principle of protection, that the fate of the Unionist party would be sealed. There would be a revival of the old Conservative party and the government would be between two fires, not to mention the very lively back fire the Farmers have started. But the whole situation is more or less in the hands of the Farmers, who have practically forced the Liberal party into a reserve seat in the Ottawa caucus. It may seriously disturb the sleep of the Conservatives and Unionists in the province of Ontario.

On the budget the government has the advantage of taking an affirmative position and they have come through with a good working majority. The next step probably will be to strengthen the cabinet by promoting some members of the house to portfolios. It would be dangerous to appoint outsiders because the government cannot afford to lose many more by-elections.

BELIEVE MUND HAS SUICIDED.

*Edmonton, June 3.—Search for Thomas Mund, who is alleged to have brutally murdered his children, a boy and a girl, aged 10 and 15 years respectively, children of Otis Macdonald, Sir. Mund was arrested on June 1st. A party of 100 police and farmers are scouring the district, but at late hour last night Mund was still at large.

Belief is general that Mund, rather than face capture, has committed suicide in the Pembina river. He is alleged to have secured sanction to have the children accompany him on his pretext of planting a spruce tree on the grave of Mund's father. Bodies of the children were found with their hands battered out of recognition, supposedly by a blunt instrument.

HEAVY RAINS HAVE PUT OUT FOREST FIRES

St. John, N.B., June 3.—Heavy rain in northern New Brunswick and other districts put an end to the menace of many forest fires. Two new fires were reported Tuesday near New Brunswick and another in southern Miramichi, but they are under control. The situation in Victoria and Manitoba is much improved in the same way. The fire at Glenzie on the Fredericton and Grand Lake railway in Sudbury county has burned about 1,200 acres.

1870 Our Golden Jubilee 1920
"The Golden Rule"
THE Golden Rule puts you in the other man's place.
The Golden Rule requires every man to act toward his fellow as he would have his fellow act toward him in like circumstances.
The Golden Rule is the ultimate motive of life insurance. It puts you in the place of your wife, your boy, your girl. If you were helpless or dependent you would crave protection; so that by the Golden Rule those who are dependent upon you demand protection.
In taking life insurance we obey the highest of laws—a statute that has divine sanction. To that extent at least we follow the Golden Rule, one of the foundation stones of the better world of the future.
Adopt the Golden Rule!
Secure Adequate Life Insurance!
Be a Mutualist!
